**Subject:** RE: DRAFT LETTER ON LCP PHASE 4 CO2 SPARGING  
**Attachments:** LCP Chemicals- Pilot study OU1

We're going for the OU1 work (E-mail attached). We figured that we didn't need to see the mob work, and the aerial survey wasn't gonna take all day. However, we had planned on all of the 28<sup>th</sup> for witnessing the sampling. Since we didn't know the CBA/OU2 schedule until today, it's nice that there will be some overlap...

Are you headed down for the OU1 work or the OU2 work or both? Pam and I did not have those dates on our calendars. Thanks,

We're good with it. Any gains through editing/consolidation of comments would be offset by the delay in getting the comments to Honeywell/Mutch. Be prepared for them to gripe about the comments...

Look forward to seeing y'all on-site 03/27-28. We'll probably get there after lunch on the 27<sup>th</sup> and be there all day on the 28<sup>th</sup>.

Please see attached and provide input as soon as possible. I would like to get this out early next week. I used the comments provided directly with no editing.

Thanks and have a great weekend.
